[Docket 31-99]

Foreign-Trade Zone 149—Freeport, Texas; Application for Foreign-Trade Subzone Status; Dow Chemical Company (Petrochemical Complex), Brazoria County, Texas

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Brazos River Harbor Navigation District, grantee of FTZ 149, requesting special-purpose subzone status for the petrochemical complex of Dow Chemical Company (Dow), located in Brazoria County, Texas. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a-81u), and the regulations of the Board (15 CFR part 400). It was formally filed on June 15, 1999.

The Dow petrochemical complex (8,555 acres, 5,300 employees) consists of five sites in Brazoria County, Texas: *Site 1:* Plant A petrochemical manufacturing facility and marine terminal (1,571 acres) located adjacent to Port Freeport at FM 1495; *Site 2:* Plant B petrochemical manufacturing facility (3,077 acres) located at State Hwy. 288-B and State Hwy. 332, north of the Brazos River; *Site 3:* Oyster Creek petrochemical manufacturing facility (825 acres) located at the intersection of State Hwy. 332 and Route FM 523; *Site 4:* Oyster Creek expansion site (904 acres) located adjacent to Site 3 south of the intersection of State Hwy. 332 and east of Route FM 523; and *Site 5:* Stratton Ridge storage facility (13 underground caverns with 15.3 billion-pound storage capacity on 2,178 acres) located south of Route FM 523 and intersected by County Road 226. The olefins plants (5,300 employees) produce a variety of petrochemical feedstocks and fuel products, including ethylene (3.3 billion-lb. capacity), propylene (865 million-lb. capacity), butadiene (425 million-lb. capacity) and pyrolysis gasoline (875 million-lb. capacity), propane, benzene, and naphtha. Some 37 percent of the inputs, including fuel oil, naphtha, condensate, and natural gasoline, are sourced abroad.

Zone procedures would exempt the petrochemical complex from Customs duty payments on the foreign products used in its exports. On domestic sales, the company would be able to choose the Customs duty rates that apply to certain petrochemical feedstocks (duty-free) by admitting incoming foreign inputs (e.g. naphtha, fuel oil, and

condensates) in non-privileged foreign status. The duty rates on inputs range from 5.2¢/barrel to 10.5¢/barrel. Under the FTZ Act, certain merchandise in FTZ status is exempt from *ad valorem* inventory-type taxes. The application indicates that the savings from zone procedures would help improve the refinery's international competitiveness.

In accordance with the Board's regulations, a member of the FTZ Staff has been designated examiner to investigate the application and report to the Board.

Public comment is invited from interested parties. Submissions (original and 3 copies) shall be addressed to the Board's Executive Secretary at the address below. The closing period for their receipt is August 24, 1999. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period (to September 8, 1999).

A copy of the application and accompanying exhibits will be available for public inspection at each of the following locations:

U.S. Department of Commerce, Export Assistance Center, 500 Dallas, Suite 1160, Houston, Texas 77002
